To Professor Daniela Rossi
Coordinator of the PhD Program in Molecular Medicine
Department of Molecular and Developmental Medicine
University of Siena

Dear Professor Rossi,

In my capacity as Senior Forskare at the Department of Neuroscience, Karolinska Institutet, Stockholm, I am pleased to formally invite Ms Claudia Vitale, PhD student of the XXXIX cycle enrolled in the PhD Programme in Molecular Medicine at the University of Siena, to undertake a research visit at our department.

During her stay, Ms Vitale will work under my supervision on the project entitled "Electrophysiological and immunohistochemical studies on neuronal structures and neurotransmitters involved in movement control." This project is well aligned with the ongoing research activities of my laboratory.

The planned period of the research visit is from 1 April to 30 July 2026.

This letter is issued to confirm the invitation and to support Ms Vitale's application for accommodation through KI Housing, should she be eligible.

Please do not hesitate to contact me should you require any further information.

Yours sincerely,

Emanuela Santini

Karolinska Institutet Housing Services

I am writing to confirm that Ms. Claudia Vitale has been invited to my laboratory at the Department of Neuroscience for a research internship as part of her doctoral appointment at the University of Siena, Italy.

Ms. Vitale will join my group on April 1 and will remain until July 31, 2026. To ensure that she is able to fully benefit from her research stay at Karolinska Institutet, I would like to formally express my strong recommendation that Ms. Vitale be given priority consideration for accommodation through Karolinska Housing.

Ms. Vitale is a highly motivated and promising early-stage researcher who proactively contacted me with the intention of gaining international research experience and contributing her expertise in electrophysiological methodologies to a research project investigating alterations in the basal ganglia in the context of Parkinson's disease.

I look forward to a productive collaboration with Ms. Vitale and would greatly appreciate your consideration of her application for Karolinska Housing for the duration of her internship at Karolinska Institutet.

Should you require any further information, please do not hesitate to contact me.
